From the New York Herald.

Considering the matter of vailrond management—of mismanagement in this State—we select the case of the New York Central because it ought to be intrusically the most vainable railway property in the country. There is no read of similar magnitude that approaches it in the advantage of the route, and the extent and importance of its connections. It runs by an easy grade, with no short curve, through a succession of the route, and they state that the fact that the fact of the fact, and is time of the safety of the route of less than three hundred mines, on its nath line, bit owning side lines and branches to the length in all of about live hundred mad fifty miles. It is great trial the Eric, has a line four hundred and skyt-elght mines in length, taming over and around mountain ridges and activities, curves so sharp as to call for more than with double the amount of motive power required on the Gentral. While the regist facilities of the Eric are excellent the local traffle of the Central largely exceeds that of its fival, and the cost of labor and material, with the single exceeding of fuel, is about the same. To a superficial observer the stock of the Central should be worth nearly take as much as that of the Eric. The fact is that both should be, from their several advantages, good paying coals mader prodent and honest management, sach as a competent business man would give his sown affairs, yet the stock of the Central is in really worth about par, while the value of the Eric is much less.

When Dean Richm and succeed d to the Presidency the abases at Albary stopped. The carriage system was to oben up, and trains were un by way of Troy to the convenience of shippers of freight and through passengers. But then another source of complaint was alsecovered—It was from that Dean Richmond was very largely interested in propeller lines running from Buffalo up the lakes, and it was alleged that shippers of freight were virtually corrected into patronizing that the, to the ducet injury of the stockholders of the road.

There is no doubt good cause for complaint against the most management of the Central road, but the cell is by no means confined to that company. At its road lies the violation of that sound principle of law which forbids my person netling in a fiduciary capacity, such as a President or director of a taiload, from being at once mayer and sciler, or in other words from haing interested in a contract made with binnedly. The Brie road has suffered from this cause, one of its former presidents having been motorlously interested in contracts made with the road. The two chafacters are frequents that he can be enoughed in the stockholder.

We may well look to this cell, as the primary cause of the depressed value of railroad stock in this country. The Prolits are enoughed to a

pluy to the stockholders.

We may well look to this evil, as the primary cause of the depressed value of railroad stock in this country. The profits are enourous on a large number of roads, and yet who even heard of any person making a fortune out of a railroad, unless he happened to be President, or a Director on the President's side, or an employe, Director on the President's side, or an employe, or a facky stock speculator. In a legitlmsto way our railroads, which ought to be the best paying concerns in the country, are but beggatly property. These facts must be patent to all reflecting men, and yet stockholders confline to be duped, and refuse or neglect to unite in putting a stop to a system which is every day taking money out of their own packets to entite those who laugh at them white they profit by their credulity.

INTERESTING TO RAILBOAD TRAVELERS. following "rules of the road" are based upon legal decisions, and ought to be universally known. The courts have decided that applicants for lickets on railroads can be ejected from the ears it they do not offer the exact amount of their fare. Conductors are not bound to make change. All railroad lickets are good until used, conditions "good for this day only" or other admitting time of genuineness, are of nonecount Passongers who lose their tickets was be ejected from the cars unless they purchase a second one. Passengers are bound to observe decorum in the cars, and are obliged to comply with any reasonable demands to show their tickets.-Standing on the platforms or otherwise clotating the rules of the company, renders a person liable to be put off the train. No person has a right to munopolize more seats than he has paid for and any article left in the sont while the owner is temporarity absent, entitles him to his seat or his return.

New Dathy Paper,-The first number of the Oll City Daily Register made its appearance yes terday. It is a handsome sheet of twenty-four Corry Telegraph. Letter from New York. From Our Own Correspondent.

NEW YORK, Dec. 4th, 1860.

Sporting is the order of the day. Anything shich is fancy will do, no it yachtling, rat-killing. horse racing, base ball, cricket, or billiard playing. Cold weather, frozen toes, stiff fingers, and red noses make no difference; the wind and weather cannot control human affairs as it once did. Man is too smart for the elements at lasthe loves to whisper through the silent chambers of the Atlantic; he laughs to ecorn her huge all the directors in the county in the course of waves and storms, scudding from shore to shore mighty bulk upon her breast, that the sighings of the old Sea God are unnoticed. spanking winds, and crack your checks," as the poet would sing, provided he had the opportuilty. I have several items of rare and refreshing

east at the Pithole election for burough officers sporting intelligence to report this week, which are really so new and startling, it almost takes one's breath away to mention them. The great Atlantic Derby race which is to come off next weck between Sandy Hook and Cowes Harbor, Isle of Wight, begins to fill all classes with in-tense excitement. Immense crowds of the sporting frateralty will go down to Sandy Hook to witness the departure. Remember, \$29,000 is the amount put up, and whoever what the race will throw down the gauntlet to the whole world. There is a chance for you, Johnny Bull, and Johnny Crapeau to go in and win? These There is a chance for you, Johnny Bull, adventurous Sea Kings from the North will be apt to have well-wet coats when they reach Cowes.

In horse-racing we have to mention Mr. Leon-In horse-racing we have to mention Mr. Leonard Jerome, who proposes to stand upon the bare backs of two horses, and drive four-in-hand around his park at Fordham. This is considered a dering feat. The next thing we shall hear of, Prof. Lowe will attempt a voyage to the moon, issuing tickets for the round trip.

Those who are posted in such matters say that for \$1,000, between McDevitt of this city, and Goldthwaite of Boston, came off at Irving Hall before an excited and crowded audience on the 30th inst. It was a carour game of 1,500 points, and was easily won by Goldthwaite. It is highly amusing to read the reports of these games. For instance we are informed that McDevitt, sen. sitive in the extreme, when it was evident that Goldthwalte would bent him, "became so utterly disgusted with bimself and his position in the game as to be wholly indifferent whether the table was rectangular or round, whether the balls relied timly or relied from side to side." When a man is " disgusted with himself," what is he to

We sometimes hear of men cettler into this delightful state of feeling in relation to them, selves, but a stranger thing than even that must be noticed by my pen this week. A young miss has been playing a little "gum game," and she is now in the last stages of disgust, or as Mrs. Malaprop would say in the play, "Perfectly putrifled with herself," Don't start at this; I hav the authority of Lord Derby for the quotation But to the young lady in question. A Miss Somebody, according to a statement published in the New York Times of a recent date, in Newburyport. Mass., has announced that she had re eived a letter from Mr. Croaby, of the great Art Association, informing ther that she was the for-tunate drawer of the Opera House at Chicago! The young lady has evidently been sold, at a much less price than the value of the Opera House. The truth is, Mr. Crosby could not have written such a letter, for the "drawing" does not take place until the 21st of January, 1307. As the time approaches, however, not only the young ladles of Newburyport, but people from di parts of the country, are rapidly procuring

certificates of membership to the Art Association While I am talking about the ladies, I may as well mention that Mrs. John Morrissey, the wite of our celebrated Congressman, has just presented to President Roberts a check for \$1,500, which he is to use for the punishment of the Canadians, when the celebrated "hanging day" comes off, which the "Canneks" threaten against the Fe-

ulan prisoners.

The excitement in this city in relation to the "Revolution in Ireland," still continues. The icadquarters on Chatham street are througed with Irishmen who rapidly culist into the service. Money and arms come pouring in from all quarers, and many of our prominent merchants and tusiness men are contributing liberally to the cause. "Iroland for the Irish," is the cry, and a regular Itish ceno replies: "America for the Americans." The "tocsin of war," supposed by some to be the big bell at the City Hall, is

non to sound. "Oh, what a fall was there my countrymer When you, and I, and all of us fell, when the great Casar died!" This sublime quotation is oupled with the fact of to-day, that Henry Ward Beecher is writing a novel for the New York Leager. It is thought the story will be a good one, and increase the sale of Mr. Bonner'

Over 16,000 poor women and children were provided with a good Thanksgiving dinner in this city on the 29th ult.

The ladies of New York are rapidly adopting the Paris fashion of "short dresses" for the street. They are really in good taste, neat, and what is better, sensible. The under skirt, which is worn longer than the dress, comes down to the ankles, and is always of some billiant color red or scarlet, in patterns of black seeming to be the invorite.

Thanksgiving week was a "fat" one for the heatres, well "sinfled" with greenbacks, (as theatres, well

well as converse backs,) for the proprietors.

The weather, never falling topic for discushas been so remarkably line for the month of November, that it deserves a passing notice If Hood had fived in this city the past season be would change at unce his dreary poem about no sun, no mon, no night, no day, no anything, November!" It has been so warm that fans have had to be used. What's the matter up at the North pole? Yours, &c., J, E. C.

Soldiers' Bounties. - We were favored last evening with a call from S. Todd Perley, Esq., of Eric, a gentleman whom we dare say knows more about the United States laws on the mile iect of nensions, bounties and claims generally an any other man in this State.

Mr. Lanman Chase attends to the branch of fice of Perley's Claim Agency in Titusville and vicinity, and will give prompt application to every form of claim against the Government that my be taken to him. Soldlers should entrust the collection of their bounties only to those who are thoroughly posted on the subject. We have no hesitation in recommending Perlev's Claim Agency, represented by Mr. Lammon Charc.

THERE will be a meeting of the Young Men's Literary Association this evening, at the office of E. H. Chase, Feq. on Place street; at eight o'clock. A full attendance is desirable, as business of importance will be transfered. fawir bereiter, Berritary.

New Process of Oil Refining.

Mesors. M. P. Ewing and H. P. Everest, of Rochester, New York, have perfected a new process of refluing petroleum, which is likely to supersedu all other methods now practised, and company has been organized in Rochester for the purpose of refinfing petroleum by this proess, which the Express describes as follows

cess, which the Express describes as follows:
Every one is tantillar with the beneficial results aliable from the refuing of sugar is searce, whereby the purest and whitest sugars are produced. The tact that petroleum oils have burelofue been distilled under atmospheric pressure at a high degree of heat, accounts for the bad odors of the kerosene oils in use. The distillation being a destructive one, naphtia, benzane, tar, Ace, are produced, and at least five precent of the ende oil is manufactured into gas, which is incorporated largely with refund oil, rendering the same explosive. By distillation is mente, as conducted by the Vacuum Oil Contrary of the left of the capitation of the refined pany of this city, the acquisition of the reflic oil from the heavier portions, or residuum, is a of from the heavier portions, or residuan, in secomplished at so low a temperature by steam that no gas is produced, which harms with the brilliancy of maphiths or compleme, while it is perfectly state to use—standing the issual test or 110 degs., or over.

The residuant of this new process is a heavy smooth control oil. which is deprived of all

greenish colored oil, which is deprived of all evaporative qualities, and is patented as a new and valuable manufacture. It has been thuroughly tested by Messia, Alling Broblets, of this city, as a currier's oil, and proves equal, if not superior, to the best fish oil in mos. It is also an excellent lubricating oil, as all the evaporating portions have been removed by the vacuum process; it does not evaporate when used either as a currier or as a lubricating oil. This heavy oil also but us without odor in a common in lamp.
